

Café Series C1500

Café Series C1500

Café Series C1500 rear view

The Café Series C1500 is our largest unit and was designed to accommodate coffee shops and restaurants in need of larger volumes of water. Thoughtfully designed, all sensitive electrical components are on the top of the unit limiting the chance of water contact. This, along with a rollable base that houses the tank (optional), also makes it easier to service. The makes enough water to feed multiple espresso machines, large capacity brewers, water towers, and in-house cold brew programs. Includes 28-gallon tank. Our systems are 100% designed and hand built by Living Water in California.

Price: \$5495 including tax Optional base: \$300 including tax
Additional costs for installation
